

March 1, 2023

To whom it may concern:

Bolt Energy Group has converted 100% of our racquet court lights from metal halide to LED. This project was completed over two phases and consisted of over 50 fixtures. Their professionalism and product knowledge were evident from the initial proposal through installation and go live.

Bolt Energy Group also provided exceptional support in working with our local electrical company (TEP) to maximize our rebate and even helped us ensure the rebates were processed in a timely manner.

The final product exceeded our expectations and has been well received by our members and guests.

Sincerely,

Mark J. Pieroni
